

TRASHCAN

BRAND GUIDELINES
Claude execution
guide

Version 1.0 • October
2026

Cleaning business, **cleaned up.**

TRASHCAN is a modern SaaS CRM and operating system for cleaning businesses. The brand should feel like premium software—not a janitorial company, not a generic startup template, and not a playful consumer cleaning brand.

Core principle: utility with attitude. Every screen should make the operator feel that the business is organized, visible, fast, and under control.

Primary brand promise — The operating system for cleaning businesses.

Primary product tagline — Cleaning business, cleaned up.

1. Brand foundation

The rules that should remain consistent across the website, dashboard, mobile app, ads, presentations, and product UI.

Element	Specification
Brand name	TRASHCAN — always uppercase in the primary wordmark.
Category	Cleaning-business CRM / operations SaaS
Personality	Confident, clean, direct, modern, slightly irreverent, operational.
Audience	Cleaning business owners, operators, office managers, dispatchers, and field teams.
Brand archetype	The Operator: organized, decisive, practical, efficient.
Core promise	Bring jobs, customers, teams, scheduling, payments, and business insight into one system.
Visual idea	Dark software environment + bright lime action layer + generous white space.
Avoid	Sparkles, spray-bottle clichés, house icons, excessive gradients, purple SaaS aesthetics, cartoon trash cans, chil

Voice

- Direct: say what the product does without corporate filler.
- Operational: talk about jobs, routes, teams, customers, payments, and outcomes.
- Confident: short statements; avoid apologetic or overqualified language.
- Human: the product serves people running real businesses.
- Lightly irreverent: the name TRASHCAN gives permission for occasional cleverness, but the product must remain credible.

2. Logo & icon system

Primary wordmark. Set TRASHCAN as a strong geometric sans-serif wordmark with tight-but-readable tracking. Preferred lockup: simplified trash-can icon at left + TRASHCAN.

- Icon: 32×32 grid; heavy vertical body; simple lid; slightly softened corners.
- Light background: BLACK wordmark + LIME icon.
- Dark background: WHITE wordmark + LIME icon.
- App icon: LIME trash-can mark centered on BLACK rounded-square field.
- Do not rotate, stretch, bevel, add gradients, add drop shadows, or place the logo inside a decorative badge.
- Clear space: at least the height of the icon lid on all sides.

3. Color system

Primary palette

Token	Hex	Use
--tc-black	#0B0F14	Primary dark background, navigation, hero, footer
--tc-lime	#B8FF00	Primary CTA, active states, icon, highlights
--tc-white	#FFFFFF	Cards, page background, primary text on dark
--tc-gray-900	#111827	Primary dark text
--tc-gray-700	#374151	Secondary text
--tc-gray-500	#6B7280	Muted text
--tc-gray-300	#D1D5DB	Borders, dividers
--tc-gray-100	#F3F4F6	Subtle surfaces

Semantic colors: Blue #3882F6 (info), Green #10B981 (success), Amber #F59E0B (warning), Red #EF4444 (danger).

Color ratio: use black/white/gray for roughly 85–90% of the interface. Lime is an action color, not a general background.

4. Typography

Primary typefaces

Role	Font	Weight	Guidance
Display / Headlines	Satoshi	700 / 800	Bold, compact, confident. H1/H2 and major numeric metrics.
Body / UI	Inter	400 / 500 / 600	Navigation, forms, tables, labels, paragraphs, dense UI.
Fallback	Arial / sans-serif	system	Use only if Satoshi/Inter assets are unavailable.

Type scale: Display 64/42px; H1 48/36px; H2 32/28px; H3 22/20px; Body Large 18/17px; Body 15–16px; UI Label 12–13px. Desktop/mobile values respectively. Display/H1 use 700–800; body/UI use 400–600.

5. UI design language

- 12-column desktop grid; max content width ~1280px.
- Hero uses generous negative space and strong hierarchy.
- Dashboard uses persistent dark left navigation rail and bright workspace.
- Cards: 12–16px radius; avoid excessive rounded-pill UI.
- Use 1px borders and subtle shadows. Not every component should float.
- Spacing: 4px base; preferred rhythm 8 / 12 / 16 / 24 / 32 / 48 / 64 / 96px.

Buttons

Type	Style
Primary	Black or lime depending on background; 12px radius; semibold; clear action verb.
Secondary	White/transparent with gray border; black text.

Type	Style
Dark hero CTA	Lime fill + black text; optional arrow icon.
Danger	Red only for destructive actions; never decorative.

Product UI

- Sidebar: black, compact, icon + label; active item gets a lime-tinted surface.
- Dashboard cards: white, low-noise, strong numeric metric, small contextual label.
- Status pills: restrained colors with small dot/icon.
- Charts: minimal gridlines; lime primary series; semantic colors only when meaning requires.
- Tables: prioritize scanability; actions at far right.
- Forms: labels above fields; clear error states; lime focus ring at reduced opacity.

6. Dashboard specification

Area	Content
Top bar	Page title, date/context, search, notifications, user avatar.
Metric row	Jobs Today / Completed / Issues / Revenue.
Main left	Revenue chart + upcoming jobs or today's route.
Main right	Team performance + recent activity.
Bottom	Upcoming jobs, operational alerts, and quick actions.

Example: Good morning, Mike. • 18 Jobs Today • 14 Completed • 3 Issues • \$2,840 Revenue. Intelligence examples: “You have 3 cleaners underbooked tomorrow.” “Job #284 is running 37 minutes over estimate.” “Your Tuesday route has 46 minutes of unnecessary drive time.”

7. Landing page architecture

Section	Direction
1. Navbar	Logo; Features; Pricing; Resources; Log in; lime Get Started Free.
2. Hero	Dark background. “Cleaning business, cleaned up.” Lime emphasis. Dashboard/device mockup on right.
3. Proof strip	Only factual/verified metrics or customer logos.
4. Feature grid	Jobs, Customers, Teams, Schedule, Quotes, Invoices, Reviews, Reports.
5. Intelligence	Light surface with pale-lime operational recommendations.
6. Human/product	Real cleaner/operator photography paired with product UI.
7. CTA	Dark block: “Less admin. More clean.” Lime CTA.
8. Footer	Logo, product links, company, legal, social, concise positioning line.

Hero copy: Cleaning business, **cleaned up.**

TRASHCAN is the all-in-one CRM and operations platform for cleaning businesses. Book jobs, manage your

team, get paid—and keep everything in one place.

8. Photography & imagery

- Use realistic commercial photography, never generic stock-photo poses.
- Show actual homes, kitchens, bathrooms, living spaces, commercial spaces, cleaners, phones, and operational moments.
- Premium but attainable: natural daylight, realistic homes, documentary framing.
- Black TRASHCAN polo shirts may be used in branded photography.
- Wide environmental compositions are preferred when showing cleaners at work.
- Dark product sections may use subtle photography under a black overlay; UI remains the focal point.

9. Motion & interaction

- Micro-interactions: 150–220ms ease-out.
- CTA hover: slightly brighten lime and translate up 1px.
- Cards may rise 2–4px on hover with restrained shadow.
- Dashboard numbers may animate once on initial load.
- Motion communicates state; it is not decoration.

10. Accessibility & responsive rules

- Do not use lime as small body text on white.
- All controls require visible focus states.
- Minimum touch target: 44×44px.
- Body text at least 15–16px on mobile.
- Maintain readable contrast in dark hero areas.
- On mobile, collapse dashboard sidebar into bottom/tab navigation or compact menu.
- Move hero product mockup below copy on mobile; do not squeeze desktop composition.

11. Engineering tokens

Use these CSS variables as the source of truth:

```
:root { --tc-black: #0B0F14; --tc-lime: #B8FF00; --tc-white: #FFFFFF; --tc-gray-900: #111827; --tc-gray-700: #374151;
--tc-gray-500: #6B7280; --tc-gray-300: #D1D5DB; --tc-gray-100: #F3F4F6; --tc-blue: #3882F6; --tc-green: #10B981;
--tc-amber: #F59E0B; --tc-red: #EF4444; --tc-radius-sm: 8px; --tc-radius-md: 12px; --tc-radius-lg: 16px; --tc-shadow:
0 10px 30px rgba(11,15,20,.08); --tc-font-display: "Satoshi", Inter, Arial, sans-serif; --tc-font-body: "Inter",
Arial, sans-serif; }
```

12. Master Claude build prompt

Paste the following prompt into Claude when asking it to build or redesign the TRASHCAN site/product. Attach this PDF and the visual reference when possible.

You are the lead product designer and senior frontend engineer for TRASHCAN, a premium SaaS CRM and operating system for cleaning businesses. BRAND Name: TRASHCAN Positioning: The operating system for cleaning businesses. Primary tagline: Cleaning business, cleaned up. Personality: confident, clean, direct, modern, operational, slightly irreverent. Audience: cleaning business owners, operators, office managers, dispatchers, and field teams. NON-NEGOTIABLE VISUAL SYSTEM - #0B0F14 dark; #B8FF00 electric lime; #FFFFFF white - #111827 gray 900; #374151 gray 700; #6B7280 gray 500; #D1D5DB gray 300; #F3F4F6 gray 100 - Info #3882F6; success #10B981; warning #F59E0B; danger #EF4444 - Display font: Satoshi 700-800 - UI/body: Inter 400-600 - Fallback: Arial/sans-serif - 4px base spacing; use 8/12/16/24/32/48/64/96px rhythm - 12-16px card radius; 12px buttons - Dark left navigation + bright workspace - Lime is for actions/highlights, not general backgrounds - No purple SaaS gradients, excessive glassmorphism, cartoon cleaning graphics, generic spray-bottle/sparkle/house icons, or huge pill-shaped controls LOGO Create a clean geometric trash-can icon and TRASHCAN wordmark. Dark background = lime icon + white wordmark. Light background = lime icon + black wordmark. App icon = lime mark centered on #0B0F14 rounded square. Do not use a literal illustrated trash can or decorative effects. LANDING PAGE 1. Navbar: logo, Features, Pricing, Resources, Log in, lime Get Started Free. 2. Hero: dark. Headline "Cleaning business, cleaned up." with "cleaned up." lime. Supporting copy: "TRASHCAN is the all-in-one CRM and operations platform for cleaning businesses. Book jobs, manage your team, get paid—and keep everything in one place." Show a polished dashboard/device mockup. 3. Proof strip: only verified metrics/logos. 4. Feature grid: Jobs, Customers, Teams, Schedule, Quotes, Invoices, Reviews, Reports. 5. TRASHCAN Intelligence: pale surface with operational insights. 6. Human/product photography. 7. Dark CTA: "Less admin. More clean." 8. Footer. DASHBOARD Dark sidebar with Dashboard, Jobs, Customers, Teams, Schedule, Quotes, Invoices, Payments, Reviews, Reports, Settings. Top bar. Metrics: Jobs Today, Completed, Issues, Revenue. Revenue chart. Today's route/upcoming jobs. Team performance. Recent activity. TRASHCAN Intelligence recommendations. Use realistic demo data and prioritize scanability. MOBILE Design intentionally for mobile. Use bottom navigation or compact menu. Stack cards. Simplify charts. Keep primary actions thumb-accessible. COPY Short, direct, operational. Examples: "Book it. Assign it. Clean it. Get paid." "Less admin. More clean." "Your cleaners clean. TRASHCAN handles the rest." Avoid corporate filler. ENGINEERING Build reusable components and centralized design tokens. Use semantic HTML and accessible labels. Keyboard navigation and visible focus states are required. Minimum touch target 44px. Avoid one-off hard-coded styles. Keep visual hierarchy consistent across routes. QUALITY BAR Make it look like a real funded SaaS product that could launch tomorrow—not a generic AI-generated dashboard. Every element must have a purpose. Use strong whitespace, restrained color, excellent typography, realistic product data, and polished responsive behavior. Before coding, translate the guide into: 1) design tokens, 2) component system, 3) page hierarchy, 4) responsive rules, 5) final implementation. Do not merely describe the design. Build the actual interface.

13. Final QA checklist

- Does it immediately read as TRASHCAN rather than a generic SaaS template?
- Is #B8FF00 reserved for meaningful actions and emphasis?
- Are Satoshi/Inter used consistently?
- Does the logo remain recognizable at favicon/app-icon size?
- Does the dashboard feel operational rather than decorative?
- Are sample metrics clearly demo data unless verified?
- Does mobile feel intentionally designed?
- Are purple gradients, excessive pills, sparkles, cartoon cleaning graphics, and generic stock imagery absent?
- Could a cleaning-business owner understand the product within five seconds?
- Does the final experience communicate: organized, fast, under control?

TRASHCAN — The operating system for cleaning businesses.
Brand system v1.0 • Prepared for product/web implementation in Claude.
